Technical Skills

Programming Languages: Python (Pandas, NumPy, Matplotlib, SciPy, Pytorch), C++
Database Management: SQL (queries, database design)
Data Science Techniques: Data Cleaning, Data Visualization
Soft Skills: Critical Thinking, Analytical Skills, Problem-Solving, Communication

Experience/Projects

SMART ATTENDANCE SYSTEM

Objective: Automate attendance marking using facial recognition.

Role: Co-Lead Developer implementing machine learning techniques.

Skills Utilized: Python (OpenCV, face_recognition, NumPy), Machine Learning, Critical Thinking.

Impact:

- Could automate attendance for a class of students, saving approximately 15-20 minutes per session compared to manual roll calls.
- The system marks attendance in around 1-2 seconds per student, handling multiple recognitions simultaneously with high accuracy.

SMART CROP PREDICTION FOR FARMERS

Objective: Guide farmers in selecting optimal crops based on data analytics.

Role: Developer building a web-based prediction model.

Skills Utilized: Data Analytics, SQL, Python, Machine Learning.

Impact:

Analyzed 6,000 rows of agricultural data to identify patterns and insights.

Visualized trends to aid decision-making, reducing crop failure risks and empowering farmers with actionable data.
